The lightning flash with arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

## Regulatory Notice

This device complies with the requirements set forth in EMC Directive : 2004/108/EC of CE Rules. Operation is subject to the following two conditions :

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A Digital Devices pursuant to EMC Directive : 2004/108/EC of CE Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

Operation of this equipment in a residential area is likely to cause interference, in which case the user will be required to correct the interference at his own expense.

**WARNING** - Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

**CAUTION** : To prevent electric shock and risk of fire hazards:

- ◆ Do NOT use other than specified power source.
- ◆ Do NOT expose the internal plastic model to rain or moisture.

# PRECAUTIONS

■ **Do not install the camera in extreme temperature conditions.**

Do use the camera unless the temperature is within -10°C to 50°C.  
Be especially careful to include ventilation in high temperatures.

■ **Do not install or use the camera in an environment where the humidity is high.**

It can cause the image quality to be poor.

■ **Do not install the camera under unstable lighting conditions.**

Severe lighting change or flicker can cause the camera to work improperly.

■ **Never use the camera close to a gas or oil leak.**

It can cause malfunctions to occur.

■ **Do not disassemble the camera.**

There are no user-serviceable parts inside it.

■ **Do not drop the camera or subject it to physical shocks.**

It can cause malfunctions to occur.

■ **Never keep the camera faced to a strong light directly.**

It can damage the sensor.

■ **Do not expose the plastic housed camera to rain or moisture.**

If it gets wet, wipe it dry immediately. Liquids can contain minerals that corrode the electronic components.

■ **Note**

*If the camera is exposed to spotlight or object reflecting the strong light, smear or blooming may occur.*

*Please check whether the power satisfies the normal specification before connecting the camera.*

# INSTALLATION

## Plastic Dome Camera

## 3 pcs Vandal Dome Camera

### 1. Dome Base Mounting

- Remove the protecting sheet from the rubber bottom and attach it on the base housing.
- Fix the base housing with the supplied 4pcs of screws (No.8-38 UNC) on the ceiling or wall.

### 2. Power Supply & Monitor Impedance (Power supply)

- Adaptor: DC12V/1A regulated Power Supply (DC12V Model)
- To avoid fire or shock hazard, must use a UL listed power supply. (Monitor Impedance, if available)
- Set the impedance switch to the 75Ω standard position unless other equipment is looped out of the monitor.

### 3. Camera Module Adjustment (Pan&Tilt Adjustment)

- Adjust the camera direction by turning the pan bracket left or right, the tilt bracket up or down, then fix the screws tight. (View Angle Adjustment)
- For a wider view angle move the zoom lever to wide, for a narrower view angle move it to tele.
- After accurate adjustment of focal length then adjust the focus lever to near or far for the sharpest focus.

### 4. Decoration Ring Mounting

- Firmly fix the decoration ring into place with the screws and by using the supplied L-wrench on the base housing.

# TROUBLESHOOTING

## TROUBLESHOOTING

If there are problems in operation, refer to the possible solutions below.

If the problem persists, please contact the distributor you purchased this product from.

### Possible Problems & Solutions

- Nothing appears on the screen.
  - Check the power connections and power supply is functioning.
  - Check the video signal line connections.
  - Check, and make sure, that the lens mode is set to DC (VIDEO) when using a VIDEO (DC) lens.
- The video image is not clear.
  - Clean the lens with a soft lint free clean cloth.
  - Adjust so the camera is not facing directly toward a bright light source.
  - Move the camera if necessary.
  - Re-adjust the back-focus of the camera.
- The screen is dark.
  - Adjust the contrast feature of the monitor.
  - If there's an intermediate device, set the 75Ω /Hi-Z properly; check termination.
  - Check if an auto iris lens is being used and adjust the brightness level.
- The MOTION DETECTION function is not working
  - Check if "MOTION DETECTION" mode is turned on in OSD menu.
  - Check if the MD Sensitivity is too low.
  - Check the setting of the MD AREA.
- The WDR function is not working
  - Check if the WDR Level is too low.
  - Check if the AE Mode is set to MANUAL. The WDR doesn't work in MANUAL Exposure mode.
- Colours are not quite right.
  - Check if the camera is facing directly into sunlight or fluorescent light.
  - Check if an auto iris lens is being used.
  - Check, if applicable, the connection of the lens connector cable.
- The Day & Night function doesn't work.
  - Check if the mode is set to something other than Auto mode.
  - Check the Day < > Night LEVEL.
